Poornima V

Professional Summary

Detail-oriented .NET Developer with strong expertise in building .NET Core, Azure, SQL Server, and angular. Skilled in designing scalable APIs, integrating complex systems, and delivering high-performance web applications within Agile environments.

Skills Profile

Technical

Operating System	Microsoft Windows
Environment	Client Side, Server Side, Database Environment and Cloud Environment
Database	Microsoft SQL Server and Azure SQL Server.
Internet Tools	Swagger
Languages	C#, Typescript, SQL, HTML AND CSS.
Other	Data Modeling, UML, RESTful API Design and Integration, Unit Testing (XUnit/NUnit), Object Oriented Programming.

Functional

Management and Leadership Skills	Proper planning, task prioritizing, and guiding teams effectively with strong communication and problem-solving skills.
Training & Development	.Net Core Application Development, Angular Front-End Development, Microsoft Azure Cloud Fundamentals, SQL Server Database Development and Rest API Development & Integration

Professional Experience

Human Resource Application **OCT 2025-DEC 2025**

Trainee / Software Engineer

Frontend, Backend, SQL Server, Microsoft Azure

Developed and deployed a Human Resource Application using ASP.NET Core Web API and Microsoft Azure. The solution streamlined hiring processes and provided secure, role-based access for Admin, HR, and Employees. I built scalable REST APIs, integrated Azure services for automation and storage, implemented real-time validation and email notifications, and ensured secure and reliable application performance through best practices and testing.

- Developed RESTful APIs for modules such as Employees, Departments, Job History, Locations, and Countries using ASP.NET Core (.NET 8) and EF Core (Database-First).
- Hosted backend on Azure App Service with Azure SQL Database, enabling secure access via JWT authentication.
- Leveraged Azure services such as Blob Storage (media/logo storage), CDN (faster content delivery), Event Grid, Logic Apps, and Azure Functions for workflow automation and serverless operations.
- Implemented an automated validation workflow for employee email updates with event-driven integration and email notifications on success/failure.

- Ensured reliability through global exception handling, proper HTTP status codes, and unit tests using NUnit/XUnit.

Environment:

Azure Cloud, ASP.NET Core Web API, .NET 8, C#, Entity Framework Core, SQL Server, Azure SQL, Azure App Service, Azure Functions, Azure Event.

Summary of Projects

Human Resource Application

Trainee / Software Engineer **OCT 2025-DEC 2025**

*Designed and developed a Human Resource Management System using ASP.NET Core Web API and Azure services. Implemented **role-based features for Admin, HR, and Employees**, automated employee data validation with Azure workflows, and deployed the solution using Azure Web App and Azure SQL Database.*

Training and Seminars

Capgemini .NET with Azure Training:

Developed strong expertise in ASP.NET Core Web API, **C# 12, Entity Framework Core, LINQ, and SQL Server**, with hands-on backend development experience. Strengthened cloud skills through Azure Web App, Functions, Logic Apps, Blob Storage, Event Grid, and DevOps practices. Enhanced capabilities in API security, **unit testing**, debugging, and Git-based version control through real-time sprint implementation.

Capgemini Angular Front-End Development Training:

Gained practical experience in **Angular, TypeScript, HTML, and CSS,** building responsive UI components using data binding, directives, forms, and services. Worked with HTTP Client for API integration, routing for navigation, and RxJS/NgRx for state management. Developed dynamic front-end applications aligned with modern UI architecture and best practices.

Certifications

- **Generative AI for Everyone** – Coursera
- **Agile Development** – Training completed during onboarding
- **Agile Methodologies (Scrum Basics)** – Internal organizational training
- **DevOps Foundation** – Udemy

Education

B.E. Computer Science Engineering (CSE) with Specialization in Cyber Security

Mepco Schlenk Engineering College, Sivakasi – 626101

Graduation year - 2021-2025

Professional Organizations

Capgemini - Software Engineer
